Loan Cost Example

The total amount you will pay for this loan will vary depending upon when you start to repay it and whether the loan is multiply disbursed. This example provides an estimate based upon a single disbursement and the deferred (postponed) repayment option available to you.

Repayment Option	Amount Provided (amount provided directly to you or the school)	Interest Rate (highest possible starting rate)	Loan Term (how long you have to pay off the loan)	Total Paid over 10 years
DEFER (POSTPONE) PAYMENTS This is the standard repayment option for your loan. Make no payments while enrolled in school at least half-time and for a six (6) month grace period following the end of at least half-time enrollment.	\$10,000	6.95%	10-year (120 months) repayment period starting after the grace period	\$18,250

About this example

The Loan Cost Example assumes a \$10,000 loan with a single disbursement, a fixed rate of 6.95%, and payments made on time beginning one month following the end of the six (6) month grace period. Other assumptions include at least half-time enrollment for forty-eight (48) consecutive months from the time of disbursement and a six (6) month grace period for a total of fifty-four (54) months of deferred (postponed) payments. Interest begins to accrue from the date of the first disbursement. Any unpaid interest accrued while payments are deferred will be capitalized (added to the loan balance) at the end of the six (6) month grace period.
